THE MEANING OF **EDUCATION.**

Eton Vice-Provost's Definition.

Slough, Dec. 16. "Education is what is left after you have forgotten all you ever learned," said the Vice-Provost of Eton (Mr. C. H. K. Marten) in presenting the prizes at Slough Secondary School to-day.

"Mathematics and other subjects may, be very dull, but they teach concentration, and there is nothing more valuable than to sit down to some great problem and keep at it until you solve it. Attempt to do something you cannot quite dothat is the meaning of education.

"It gives you a mind capable of mastering things, which is far more important than the knowledge you actually get, and yet that knowledge is not to be despised. You really want to get the groundwork of as many subjects as you can. You will discover in later life that it is extremely difficult to find time to learn, but if you have a foundation you can build on it. "I believe," added the Vice-Provost, "that games are the greatest contribution England has made to civilisation. They bring | you could not. out qualities and interests which you can get in no other way. They teach you a great many qualities which are valuable in later life."

CHICAGO UNIVERSITY.

"Graduation By Ability

education at the University of man goes out and labours in some Chicago was announced last month | futile way at some job, and expects by the university authorities.

ability of the individual student, of the practical work done in this and not the time spent or the country, and the most important of number of credits earned, is to de-lall, is the running of the homes." termine when the university shall graduate him.

GIRLS — FRAUDS!

CANDOUR OF AN ETON HEAD MASTER.

"It always seems to me that my sex has all the artistic qualities, and you have all the practical qualities," said Dr. Alington, head master of Eton, to St. Monica's School for Girls at Tadworth.

"But you are rather frauds." added Dr. Alington. "You always go about pretending that you are the artistic sex, and that is quite untrue. There are not really any feminine poets, not any great feminine artists, and as to the feminine musicians, they spend their time, very rightly, in playing things composed for them by men. | 8 a.m.

"You say, in reply, you never had any chance. I believe in the Middle Ages you had any amount of chances. All the time that people like me—the men—were out hunting the boar you were sitting | p.m. at home in your castles or whatever you lived in. Why were you not writing poems, composing immortal pictures? Simply because

Running The Home.

"Now," continued Dr. Alington, "let us go on to your merits, which are very great. I think you have all the practical ability in the world, and that you could govern the country far better than any man could do. Most bodies of governors are appalling. It is ridiculous to-say women could not do it better.

"When you come to practical things it is hardly possible to exag-A radical change in the plan of gerate the futility of men. The to come home and find everything Under the new plan, the actual | going on well. The vast majority

MATHEMATICAL DRESSMAKING.

The 300 dresses which a leading British woman dress designer is 🗮 for the new musical comedy to be staged shortly at \\ \equiv \(\) Drury Lane, "The Song of the Drum," are largely a matter of mathematics.

Each part of the dresses was numbered, and these numbers formed a code by which the designer's choice of colours and fabrics was made known to the dress artistes.

There will be another vogue of white for evenings, it is thought, as a result of the white-and-silver gowns in the ball scene, in which no note of colour appears until the men come on in uniform.

COST OF CLOTHES.

How They Manage in Australia.

An Adelaide draper, giving evidence at the women's basic wage inquiry, made a statement, since modified, that a working woman could dress herself on £14/5/ a year. To enable this to be done, different standards would have had to be adopted, not necessarily indicative of a lower standard of living, but demanding a different selection of clothes and dress accessories. Any girl or woman, working or otherwise, with an empty wardrobe, and in need of everything required from head to toe, would find the task of providing a year's clothes at such a sum impossible. But the estimate was made on the cost of materials only,

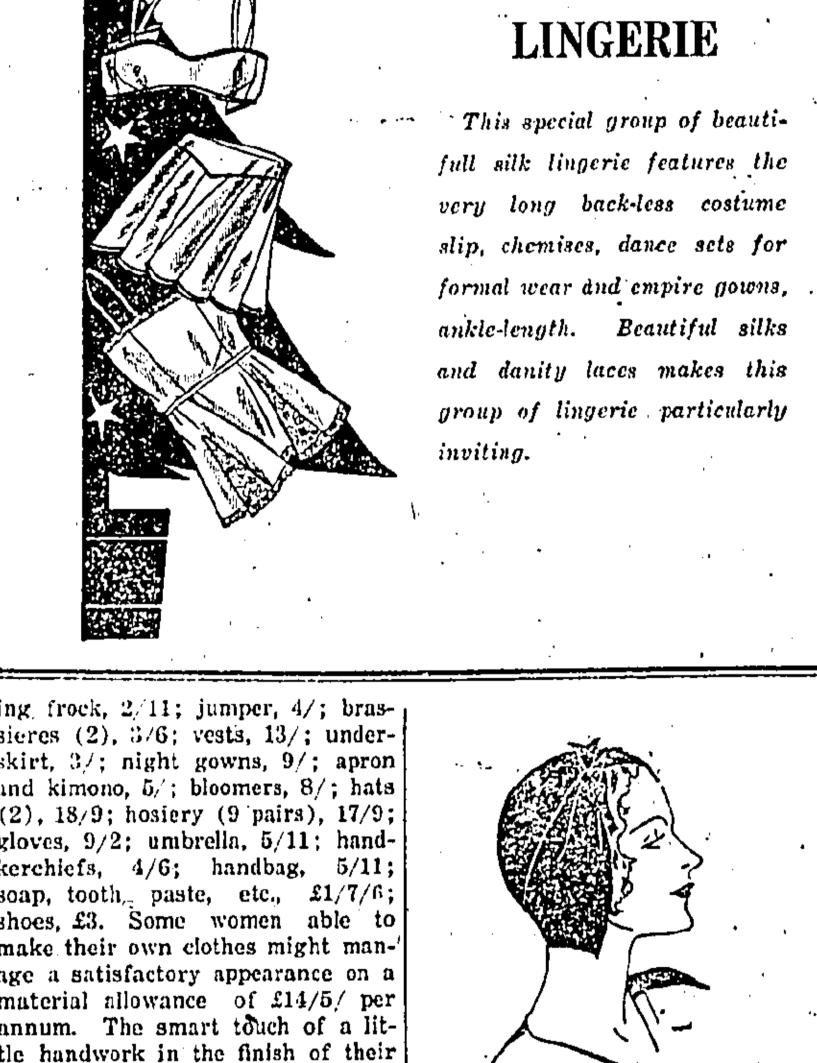

Creations are

without allowance for making. It is difficult always to work out estimates for clothes exactly to ar annual fraction, as many articles purchased the previous year. cared for as clothes should be, give useful service for considerably more be good news for the majority. than twelve months. The annual Recent styles have been cost of dress then becomes, more girls and women skilful with the or less, a matter of the expense of needle, for the quantity of material wardrobe replenishment. Con- necessary in carrying them out has sideration of this point places the been small. From remnants and figures as detailed for the en-oddments it has been possible lightenment of the Board of Indus- to make frocks of exceeding shorttry, on a basis likely to be more ness and without sleeves. The preacceptable to the average individual. sent trend of fashion demands more Costs for women's wearing apparel material. Increased skirt length, in conformity with present fashions, floating draperies, flares, sleeves, were itemised as follow:-Tweed and cape effects all mean extra coat, 15/; costume, 15/; frocks, yards when fabrics for frocks are £1/2/6; sports cont, 12/9; skirt, 10/9; voile frecks (2), 10/; wash-

sieres (2), 3/6; vests, 13/; underskirt, 3/; night gowns, 9/; apronand kimono, 5/; bloomers, 8/; hats (2), 18/9; hosiery (9 pairs), 17/9; gloves, 9/2; umbrella, 5/11; handkerchiefs, 4/6; handbag, 5/11; soap, tooth, paste, etc., $\mathfrak{L}1/7/6$; shoes, £3. Some women able to make their own clothes might manage a satisfactory appearance on a material allowance of £14/5/ per annum. The smart touch of a little handwork in the finish of their home-made garments, providing the cut was good, and materials and styles carefully selected from a suitability standpoint, could give in purse or in person, and it is not that is not necessarily dependent for the working girl's annual exupon actual cost in cash.

Gratifying Reductions. That in the opinion of retail traders it is now possible for women to dress decently at less expense than has been the case since prices soared after the war, should bought. But this is offset, fortunately, by a definite drop in prices of stuffs as charming in pattern and texture as could be desired. Much cotton, also, is now being worn and pretty prints offer tempting solution of the cheap dress prosimilarly to the average girl or woman in any station of life.

According to an old French proverb, we must always pay, whether

RECORD RUN.

HONG KONG TO NEW YORK IN 39 DAYS.

The O.S.K. Company's new motorship Hokuroku Maru, which sailed from Hong Kong on December 6 last for New York via usual ports of call in China and Japan, arrived at New York on January 14, taking only 39 days en route, which is believed to be a record run.

FUTURE OF SPEED.

HABIT WHICH DIESEL ENGINE CANNOT ESCAPE.

Everything in life tends to go faster, although possibly not relatively. Perhaps it is a law of life Large numbers of people who visit-One is inclined to speculate whether, visualising the position 20 years hence, the speed of Diesel machinery will not have increased to a considerable extent. Metallurgical science advances each day. and present limits in piston speed and permissible stresses will not hold good in 1950. Motorcar en-Igines run at twice the speed of and cost half as much as corresponding engines built a few year ago. We do not wish to press the comparison, which is, of course, not exact, but it indicates a tendency from the influence of which the Diesel engine cannot wholly escape.

The construction, for cargo and passenger ships, of internal-combustion machinery running - at speeds of 500 r.p.m. is not wholly beyond what is even now practicable, and with increasing metallurgical progress might lead to a reduction of cost to a surprising

extent. The question of speed and propeller efficiency would remain. Possibly we have not reached saything approaching the limit in this direction, so that the need for gearing-electrical or mechanicalmay not be so certain 20 years es, hence as now appears. Even so, we have gone some distance in the direction indicated, as the completion of the 10,000-ton German cruiser will show. The vessel has eight fast-running Diesel engines driving two shafts at a speed which will give the maximum propulsive efficiency: and the machinery weight has been reduced to 50 lb. per b.h.p. But it must be emphasised that no reduction in the cost of manufacture has yet been attained by this expedient, since the engines are wholly special in this design; yet their producton represents an inception of a new idea in motor ship machinery which will bear fruit many years hence.

EASTERN PORTS. DETAILS OF EPIDEMIC

CAPT. S. T. H. WILTON

Death of Former H.M.S. Malaya Commander.

Captain Stanley Haverfield Wilton, R.N., retired, died suddenly at Bushey, Herts, at the age of 51.

Captain Wilton was a gifted and versatile officer who, had he not chosen a naval career, would cer tainly have made a success" as showman, as was indicated by the admirable manner in which he produced the Zeebrugge and other spectacles in the theatre at the Imperial Exhibition at Wembley. the exhibition will remember his lucid and illuminating addresses, in which were explained the signifleance and bearing of the battles depicted by mimic engagements. To the perfecting of the mechanical arrangements involved in these tableaux he brought rare skill acquired as a gunnery officer in the Navy, and officers who were present in the St. George's Day raid of 1918 testified to the fidelity of the representation. Later on, Captain Wilton again illustrated the handiness and adaptability of the British naval officer when he took up journalism and became Naval Correspondent of the Morning Post, a position previously held by Captain Edward Altham, C.B., now secretary of the Royal United Service Institution, and Commander H.M.J. Rundle, O.B.E., now Deputy Chief Inspector of Coastguard.

Born at Bath on June 4, 1879 Wilton entered the Royal Navy in July, 1893, and became a lieutenant in September, 1900, at which time he was second-in-command of the destroyer Co-quette in the Mediterranean. Two years later he joined the Excellent to qualify in gunnery; was a junior staff officer in the Cambridge, schoolship at Devonport, from June, 1904; and subsequently served as gunnery lieutenant of the cruiser Lancaster, in the Mediterranean, the battleship Repulse, at Chatham, the cruiser Achilles, in the Home Fleet, and the battleship Vanguard, also in home waters. He was promoted to commander in June, 1918, and was selected for duty as assistant to the Director of Naval Ordinance. pecial knowledge and aptitude for this work led to his retention in the post until December, 1915, when he was appointed commander of the battleship Malaya, in which he served at Jutland. He returned to the Admiralty in August, 1917. On December 31, 1918, he was promoted to captain, and reappointed as senior assistant to the Director of Naval Ordnance until 1921. In April of that year he took the course for senior officers at Portsmouth, and afterwards again returned to the Admiralty for temporary duty in the Ordnance Department. He retired under the special scheme of May, 1922.

Captain Wilton had authority to wear the insignia of Officer of the Belgian Order of the Crown, and that of an officer of the Russian Orders of St. Stanislas, 2nd class, with swords, both of which were conferred upon him in 1917 in recognition of his work during the War. As honorary treasurer of the fund to save the old Implacable he worked with zeal and enthusiasm. He leaves a widow and three children. Of a helpful and genial disposition, he was much liked by his colleagues both in the naval and the journalistic professions.

MERSEY DOCKS.

RECORD TONNAGE OF THE PORT.

At a meeting of 'the Mersey Harbour and Board, the Chairman (Mr. Arthur showed that the rates received on vessels during the year ended July 1 amounted to £1,397,568, an in-Helikon, British str., 1,220 tons, crease of £17,918 over the previous year, but owing to the decrease in the rates, and dues on goods of £96.965 the total income from rates and dues on ships and goods showed a net decrease or £79,047.

It was interesting, he said, note that the number of vessels paying tonnage rates and harbour rates during the past year was 20,771, and that this figure had ashmir, British str., 9,000 tons, been more or less the same since the Board was constituted in 1858. from Yokohama, Kowloon The figure in that year was 21,852 and the tonnage of the vessels was 4,441,948. The tonnage for last sinking fund, £11,880 had been apyear, however, was 21,814,820. nearly five times as much and a lance account to replace the amount record for the port. There was a withdrawn, \$81,421 to renewals and surplus on the year's working of depreciation, the balance, £74,087, £267.888. and of this amount had been carried to the unappro-\$100,000 had been set aside to the pristed receipts account

FINE ACHIEVEMENT NEW LLOYD TRIESTINO LINER.

Messrs. Lloyd Triestino Navigation Co.'s new motor vessel Victoria of 24,000 tons displacement has been successfully launched in Trieste from the San Marco Dock-

The launching ceremony was presided over by Countess Ciano, the wife of the Italian Minister of Communications, who himself was the guest of honour on the occa-

The vessel slipped smoothly from the building berth amid enthusiastic cheers and the best wishes of those who had directed the construction and worked at it, as well as of many gathered to watch the event, which was a success in every respect and was greeted by everybody as the best, achievement of shipbuilding in the service of maritime communications in the Mediterranean.

The appearance of the ship, characterised by the 'slanting bow and crulser stern, is compact and sturdy. When the outfit is completed, the vessel will be a fine example of marine engineering and decorative artistry. She is being built for the Express De-Luxe Line Trieste-Alexandria, and as she will develop a speed of about 21 knots, the trip will be performed in near ly 60 hours.

This speed and the luxurious interior of the vessel will no doubt add to the attractions of the Lloyd Triestino Alexandria Line, which is one of the old services maintained by the Company and patronised by tourists from all parts of the world. She will sail on her malden voyage in June next.

The accommodation on board is for about 250 first and 250 second class and about 100 second economic class passengers.

The ship is being also engined in Trieste, and the propelling machinery is of the Sulzer system. The installation comprises 4 sets of eight cylinder engines. The total brake horse power developed is 17,000 at 134 rotations per minute. The power for the auxiliaries in the ship is supplied by four electric generators, each having an output of 534 Kw. These will be Dieseldriven by 6 cylinder Sulzer motors running at 180 revolutions per

"AENEAS" COLLISION

JAPANESE CLAIM AGAINST BLUE FUNNEL CO.

A controversy is now going on between the Ocean Steamship Company and Matsuura Shokai, a Japanese firm at Dairen, over the collision that took place off the Shantung Promontory on July 14 of the present year between the freighter, Aeneas, 10,050 tons, belonging to the Ocean Steamship Company, whose agents are Butterfield and Swire, and another freighter, Kohatsu Maru, 1,700 tons, belonging to the Matsuura

Mr. O. Okamoto, barrister-atlaw, who is a counsel for the Ocean Steamship Company, said that the collision resulted in the sinking of the freighter, Kokatsu Maru together with her cargo consisting of 2,500 tons of sait and also in the death of one of her 45 sailors, who were rescued upon the sinking of the freighter. Her owners, Matsuura Co., who hold the s.s. Aeneas responsible for the collision, have instituted a lawsuit at the Court at Dairen against the Ocean Steamship Company, demanding a redress amounting to Yen 183,000, and when the Aeneas entered the Port of Dairen on December 1, petitioned to the local Court there W. to enforce her provisional selzure

Thereupon, Mr. Ohamoto, at the request of the Ocean Steamship Company, proceeded to Dairen and succeeded in getting the freighter released after prevailing upon the Dairen Branch of the Hong Kong and Shanghai Banking Corporation to stand security for the freighter. As a result, the Aeneas left Dairen for Shanghal.

Examination of this case is thus under progress at the Dairen Court and a preliminary hearing of the case will be opened next spring at

THE CHINESE BOAT-PULLER.

Passing of a Sturdy Race.

NAVAL MEMORIES.

The development first of steam pinnaces and, later, of motorboats, has had one effect on the British Navy on the China Station, and that is the abolition of the Chinese boats' crews which in former times every ship flying the White Ensign carried in this part of the world. These stalwartsfor they were mostly that-were "carried on the books of H.M.S. Victor Emanuel," that picturesque eld wooder two-decker of the old days that was "receiving ship" at Hong Kang. They were the uniform of the British matloe, so that when H.M.S. Plover or Lapwing or Rattler came up the Menam on one of its periodical showing the flag visits, they acted as ferrymen between ship and hore and were sometimes seen There were two reasons for their employment.

Fear of Sunstroke.

In those days the British tars did not wear helmets, their sole headgear in these waters being the familiar straw "donkey's breakfast" and it was feared that they might get sunstroke while, on the other hand, some of the men left alongside piers, etc., in boats, used to make breaks of it ashore and regale themselves "not wisely but too well," just as Marryat tells us they did in the days of "Midshipman Easy." However, they were in many respacts a very useful institution. They were capital boatmen and were certainly worth their salt. But their employment led to one queer thing, and that was, that the Chinese in the various ports got the idea that Britain had to have them because her own manhood was so scanty, and so she distinctly "lost face" to some extent among the more ignorant. Dwight F. Davis, Governor-Gen-However, this "supernumerary force" existed till some 10 or 15 years ago, when some Admiralty economist discovered that there was very little boat-pulling to be done now-a-days, and so they were wiped out of the list of ratings. But they were a sturdy and useful lot and the older officers of the Navy are said to regret their passing.

"Blow You All To H-L." One day during the war between China and Japan, the writer was standing on the hatoba at Spartan came ashore. The cox- dent Manuel Quezon strongly urgswain of the boat, a burly Chin- ed just such a trip upon the Govese petty officer, stepped on to the ernor-General last year and that landing and a rather diminutive the press of official duties prevent-Japanese policeman walked up to ed its consummation at that time. him gesticulating, evidently tell- At present, however, the legislaing him to go back to his boat. tive duties of the Governor-General Whereat the worthy coxswain, have been taken care of, and the swelling himself out, touched his ardour of his work will be somehat-band and said, "You savee what ameliorated until next June. this?" and, touching his armstripes. P.I. GOV.-GENERAL

GOODWILL TOUR OF THE ORIENT.

Manila, January 7.

The U.S.S. Pittsburgh, flagship of the Asiatic Fleet, will make a farewell cruise of Eastern waters in the near future, and will carry a distinguished passenger eral of the Philippines, on an informal goodwill visit to neighbouring countries.

Reports of the projected cruise were received in Manila first from Shanghai and although they could not be confirmed last night at Malacanan, the rumour of trip of the Governor as well as the farewell cruise of the famous old flagship is believed to be wellfounded.

Furthermore, the new flagship commodation for the Governor-General on the famous old ship.

It is reported, moreover, that The Chinese boat puller passed the visit of the Governor-General

It is considered likely also that Miss Cynthia Davis, hostess of Malacanan: will accompany her father on the trip.

Since the Houston arrives late in February it is likely that the Pittsburgh will set sail on her final voyage in Asiatic waters early in March, and that the en-

tire trip will take from four to six weeks.

The flagship is thereafter to be taken back to the United States to be de-commissioned.

She is under the command of Captain Halsey Powell, and it is supposed that he will continue his command for the cruise of the Governor-General.

Peculiar sentiment attaches t the Pittsburgh, and it is regarded in Navy circles as fitting that her final cruise should carry the chief executive of the Philippines -Manila Bulletin.

HONG KONG TIDE

The tide-table given below has been obtained by aid of the Tide-predicting Machine, which includes 40 components for the better prediction of tides, from the result of the analysis of the tidal observations, taken at the Kowloon tidal observatory under the direction of Dr. Dobesck during the years 1887, 1888 and 1889.

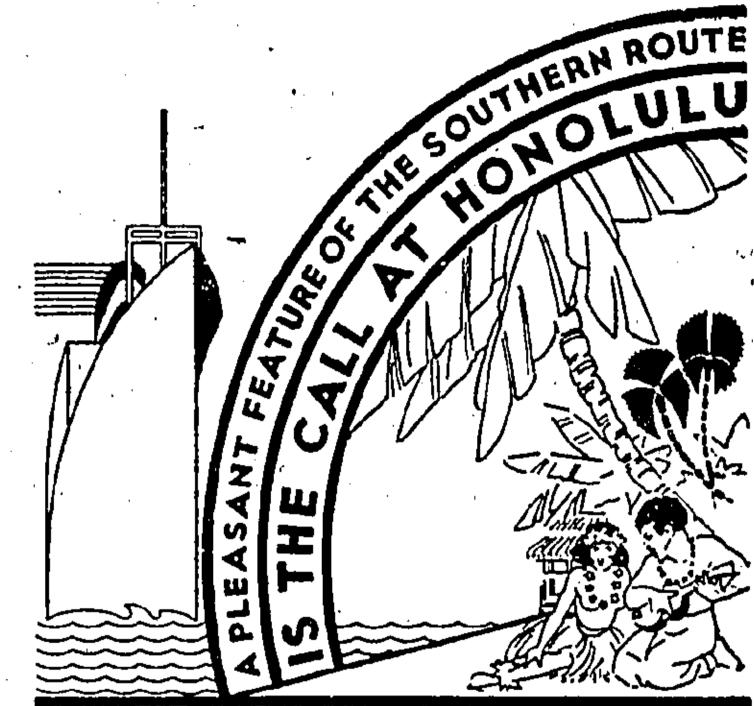

The times and heights are given for Kowloon; but they may be used for the Victoria Naval Yard and Aberdeen, the differences being very

The times of high and low-water must not be considered to coincide with the times of slack-water and change of current, the two phenomena being quite distinct.

THE WORLD OF BOOKS

MAIL REVIEWS.

"THE SOUTH AMERICAN HANDBOOK."

The 1931 edition of the "South American Handbook" (Trade and Travel Publications, Ltd., 2/6 by post 3.(-) now in its eighth year of issue, appears on the eve of two events of outstanding interest in British-South American relations. Next week the Prince of Wales will pay a visit to South America, and during his stay in the Argentine will visit the British Empire Trade Exhibition at Buenos Aires. These two events are outward signs of the great revival of British interest in South America and of Britain's determination to capture a fair share of the market when the industrial depression lifts.

The Handbook is designed t tall the business man all he wants to know about the countries o Latin-America, their products. trade, transport, carreffey, banking! Government, Consular representation, the present state of each particular industry and all the odd useful data which has to be hunted for painfully in obscure reports. This year the whole book has been drastically revised. The figures have been brought up to date. Large portions have been re-written. An important new feature, the air section, has been added. This gives all the operating companies in Latin-America and details of the routes flown. The very latest trade and political changes since going to press have been inserted in "Additions and Corrections."

Now that South America is being popularised as a "playground" more space has been devoted to the tourist interest of the handbook. The "human" side, as opposed to the strict business side of the book, has been enlarged. The hotel lists in each town have from strength to strength. been checked and many interesting facts and descriptions of tourist resorts added.

EDISON THE WIZARD.

than a hundred pages Mr. Henry of Mr. Edison.

Ford, the well-known motor-car manufacturer, out-Carlyles Carlyle, in his here worship. The whole book is typically modern American in its admiration of efficiency and labour-saving inventions. We all knew that Mr. Edison, the doyen

Mr. Edison.

of American experimenters, inventor of the phenograph, incandescent bulb, etc., was a most remarkable man: but to Mr. Ford he is more than remarkable—he is a super-man, a living mass of all the positive virtues such as energy, honesty, modesty, imagination, etc. It is thirty-four years since Mr. Ford was first

employed by Mr. Edison, and for three decades their friendship and Mr. Ford's admiration have grown

Near the end there is perhaps too

GOOD SCHOOL PRIZE.

["Everyday Marvels of Science," by W. H. L. Searle, M.Sc.; Benn, 10/6.]

It is a pity that this book should reach Hong Kong after all our schools have bought their prizes for 1930. However, we now advise, and advise strongly, the Heads of Queen's, King's, St. Stephen's, St. Paul's, and St. Joseph's, as well as those in charge at Central British, Diocesan Boys', and Wah Yan Schools down his pen with a sigh. Has Sir to put it down at once on their 1931 prize lists.

What a glorious book for a young man keen on Science! Mr. Searle describes in understandrble language many of those recent inventions and discoveries which are so changing the whole aspect of modern life. We live in an age of Science, yet how much Physics does the man in the rtreet know? As Professor Joly gays: "The fabled wonders of Jason's Argo fade to commonplace compared with the accomplished wonders of our day. The miraculous gifts of Lynceus were not so marvellous as those powers of vision and audition which Science confers." Yet how many of us take all these as a matter of course!

The many inventions and discoveries of recent years and their industrial utilisation and, we may say, domestication (wireless, etc.) have bred a new scientific consciousness: but the uninitiated flounder among simple scientific laws and details like a non-swimmer out of his depth. Mr. Searle writes for such, but more particularly for the keen young scientist. He treats clearly many recent inventions and is not too mathematical.

There are .in all ten chapters This booklet makes no claim to and each will have its own adbe a complete biography. It is a mirers. Here are the headings: simply written, loosely connected Introductory, Talking Pictures, brochure with no literary preten- Television, The Stroboscope, The sions, giving a few of the mile- Gyroscope, Range Finding, Substones in Edison's career, his marine Signalling, Measurement I"My Friend Mr. Edison," by early struggles, his methods in the ef Small Distances, Colour Photo-Henry Ford; Ernest Benn. workshop, his idiosyncrasies, etc. graphy and Problems in Wireless. What youth with a scientific reads over such a list?

Edmund Chambers done so also, in completing the great task which he undertook more than 30 years ago —an historical study of the Elizabethan stage as the background to a biographical and critical study of Shakespeare and his works? If in prospect the labour had appeared as immense as it is revealed in retrospect, the entrance upon it might have daunted even a Civil Servant, anxious for what doctors used to call "an alterative" from the routine of the Education Office. It is fortunate for human nature that it cannot see the distant prospect, or some of the world's most valuable work would remain undone, and it is certainly difficult to value too highly the contribution which Sir Edmund Chambers had made to Shakespeare literature.

Charting the Sea.

The "study of facts and problems," which he has now given to the world in two volumes, is comparable in scope and exactitude to In this small volume of less | much of Mr. Ford and not enough | bent will not smack his lips as he ka codification of such a vast and complex subject, say, as the Income

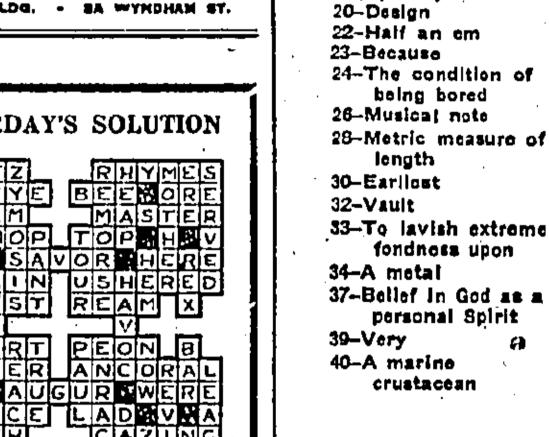

Tax Acts. It collates and elucidates in compendious form all that is essential in that formidable body of record, allusion, comparative criticism, hypothesis, and research which has gathered round the Shakespearean text and tradition. However, one may approach the Shakespeare problem-whether as a rigid traditionalist, a heretic, or a mere agnostic—it is impossible not to find a deep satisfaction in this magnum opus, so thorough in its scholarship, so judicial in its temper, so ample in its documentation. Time may have new discoveries in store; but for all that the last three centuries has brought to light, it is henceforth unneces-The multitudinous sea of Shakespeare lore has now been throughly and exactly charted. It is impossible to turn the pages of these two volumes without admiration for the diligence and devotion which have been able to compress so much into, such comparatively little compass. Sir Edmund Chambers defines his

"I collect the scanty biographical data from records and fradition, and endeavour to submit them to the test of a reasonable analysis. And, thirdly, I attempt to evaluate the results of bibliographical and historical study in relation to the canon of the plays, and to form a considered opinion upon the nature of the texts in which Shakespeare's work is preserved to us."

purpose modestly enough:

PROSPECTS FOR GERMANY.

People Watch 1930 Pass with Relief.

NEW YEAR MESSAGE.

Chancellor Bruening has Issued a New Year's message to the German nation in which he reviews the present difficulties which the country has to face, in a calm mater-of-fact spirit, seeking to divert all the political energies

The Chancellor thus says: "Millions of our people will see the year 1930 pass away with a sigh of ever more critical aspect, thus adding further weight to the depression already boring so hard upon our people, filling it with doubts whether present disposition of the political and constitutional forces were really adequate to the nation. Movements have arisen of which, starting from such doubts." represented the established order of things as the author of an imminent ruin of the state and of the people's distress. These movements claimed for themselves the ability to refushion and revivify the state and present civilization along own lines. However, such movements were to be foreseen since they are the normal phenomena appearing after the estab-A four days' search by detec- lishment of some new political tives in every l'kely nook or regime which may have failed to cranny for seven highly dangerous | realize fully the sanguing dreams

The Chancellor then refers to was rewarded when the police the unselfish sacrifices of those spotted four of their quarry enter- who made secure the unemploypoints out that German public The police rushed the place, and economic life was saved from dire ship in mid-stream returned the But here a matter takes my there was a desperate fight in the catastrophies through the codark flat for half an hour before operation of the sensible elements they finally overpowered the in the cities as well as in the countryside, reterts to those who Among them was Harry Fordon, assert that Germany is already in the so-called "Mad Butcher, whose the depth of catastrophe that "they obsession is that he is endowed don't know what they are talking about," adds that "so long as we The three men who are still at possess life-strength we shall unlarge include the world's deadli- ceasingly toil at the task of improving existing conditions" but that that strength in order to be constructive and not destructive must be disciplined.

> Finally the the Chancellor sum-Mr. Justice Swift on November marizes his New Year wishes to the 14 commented on the fact that no nation thus: "May the German woman usher is attached to the people in unity and regardless of class, profession and age accrue in He had noticed an elderly woman ability and hability to nurse and witness trembling in the box, and properly apply its rich gift and he asked if there was a woman unexhaustible forces and realize usher who could attend to her. He that constructive work requires. was told there were no women courage, industriousness and perushers at the Old Bailey, and the severance without obscuring hatred man usher went out and brought and envy and with a proper outback a woman who volunteered to look on what is important and what . . unimportant." Concluding, the "I wonder how long it will be Chancellor warns the people The Hon. Mr. S. W. Tso, LL.D., before a woman usher is provided against illusions which are always O.B.E., will distribute the prizes at at the Central Criminal Court," followed by disappointments as the the Munsang College, Kowloon City, the Judge said. "Almost every potentialities of politics are only

AIMEE McPHERSON'S VISIT TO CUBA.

New York, Dec. 13. Sister Aimee McPherson had an encounter with the Cuban imwhen she arrived at Havana in the steamer Toloa from Colon.

She is said to have been travelling under the name of "Betty Adams," and the immigration officials said she was registered aboard the ship as a "British woman "

The matter was settled this morning when Sister Aimee was allowed to land, after agreeing to resume her true name,

A friend of Sister Aimee said she was travelling incognite to avoid publicity. She is believed to be on her way to New York.

MOTHER LOVE DESPAIR. Throat Injuries Of Her Invalid

This is one of those cases in which an extremely devoted mother is suddenly seized with despair owing to the tubercular condition of her son.

She seems to have been selzed with an impulse to put an end her son's life. These were the words of Mr. Justice Charles at Glamorgan

no extensive landing field is neces- four, of Rhondda, who was accused of maliciously wounding her son.

Strengthen those

Nerves

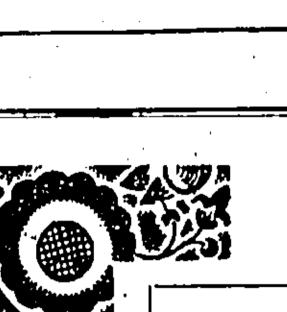

Neurasthenia (nerve-weakness) has been called the "disease of the 20th century." It is estimated that 95% of the population suffer from it. Trembling of the hands, irritability, restlessness are a few symptoms; so are sleeplessness, stomach trouble, lack of energy. All are due to one cause—weakness of the nerve-cells. It follows then, the only logical way to conquer these complaints is to strengthen the nervous system.

You can do that with Sanatogen. As a wellknown physician has stated: "Sanatogen goes; right to the core of well-being, viz., the cells and builds these up into a fabric of lasting health." Sanatogen feeds the cells of the body with the exact proportion of those elements-glycerophosphate and albumin-from which new nerve-strength is derived.

After a short course of Sanatogen nerveweakness will disappear and very soon you will feel radiantly healthy again -- strong and energetic - with a keen appetite and a new joy in life. Start taking Sanatogen to-day and notice its wonderful influence on your health.

Training Centre. First International Conference and Jamboree at Olympia. Thirty nations represented. International Bureau started.

.H.R.H. The Prince of Wales' Posse of Welcome at Alexandra Palace, 60,000 Scouts and 20,000 Cubs present.

1924 Imperial Jamboree Camp at Wembley. Second Inter-Jamboree at national

Copenhagen. Fourth International Conference at Kandersteg, attended by thirty-three

nations. Coming-of-Age World Jamboree, Birkenhead. (42) nations present.)

Better World Understanding.

Mr. Hubert Martin, Director of Boy Scout International Bureau, which has its Headquarters in London, said on December "Guatemala is the second of the Central American Republics we have welcomed into the Scout Movement, the other being the Republic of Panama. The Guatemala Boy Scouts have been fortunate in securing the President of their Republic, General Lazaro Chacon, as the Honorary President of their Movement.

Last year's Coming-of-Age Jamboree at Birkenhead, when we welcomed representatives from 42 countries, has given Scouting a great impetus throughout the world. It undoubtedly brought home to the public of all countries, something of Scouting's possibilities in the direction of Goodwill and Brotherhood."

SCOUTS TROOP IN THE JUNGLE.

Mr. H. Magnay, District Commissioner of Newcastle West Boy Scouts, told a Conference of Girl Guides in Newcastle how he met. 17 Scouts, most of them of different nationalities, in a Railway Construction Camp of 40 men in a remote part of Africa.

SCOUTS' GOLDEN ARROW AS WEATHERCOCK.

A Boys' Club in St. John Street, Stirling, for which Major F.M. Crum, for many years Assistant Commissioner for Scottish Boy ed, as a member of the Boy Scouts. Scouts, is responsible, has 'a Golden Arrow in the form of a weathercock.

The Golden Arrow has been erected as a memorial to the final scene of last year's Boy Scout Jamborce, at Birkenhead when Lord Baden-Powell performed the The growth of the Boy Scout | ceremony of "Burying the Hat-

"Here is the hatchet of war, of enmity, of bad feeling, which I row bury in Arrowe," said Lord Baden-Powell, at the same time The following year (1908), the plunging the hatchet into the Scout Movement was inaugurated midst of a barrel of Golden Arrows.

Standing at the hub of a vast human wheel, Lord Baden-Powell next sent four Golden Arrows of Peace and Fellowship to the four corners of the compass. "Swiftly"they "radiated from handto hand until they had travelled throughout the nations of the

-Then Lord Baden-Powell said. "I send you to all the world bearing my symbol of Peace and Fellowship, each one of you an ambassador bearing a mousage of Love and Friendship on the wings of Sacrifice and Service to the ends of the Earth. From now on the Scout symbol of Peace is the Golden Arrow. Carry it fast and far, so that all men may know the Brotherhood of Man."

When the Stirling Scouts came back from Birkenhead they determined that the friendships which they had made with the Scouts of uil countries should be perpetuated in the weather-vane of the Boys' Club.

On the outer walls of the Club are several badges and motioes. such as the badge of the Boys' Brigade, the Boy Scout badge and the Wolf Cub badge, with the Scottish Shield and such mottoes as "Play the Game" and "Keep Smiling."

THOUGHT FOR THE WEEK.

Lots of people are dead and don't know it.

PRISON GOVERNOR AND HIS SCOUT TROOP.

Brig.-General R. M. Dudgeon, Governor of Edinburgh Prison, spoke on the after-care of the young offender, at the Weekly Luncheon of the Edinburgh Rotary

He said that the young lads who came under his care were not really bad; a few of them were what might be called difficult, but even they had their good points. The majority of lads who found themselves in Borstal Institutions had little or no chance in life. In Edinburgh Prison they tried

to teach lads to play the game and the best way to do this was to test the lads by trusting them. "They never let me down," said the Governor, and at Saughton they had started a Boy Stout Troop in which their object had been, if possible, to have the young lads received on their release by Rover Scouts who would

lend them a helping hand. General Dudgeon paid a high tribute to the Boy Scouts when he said that the after-care work carried out by members of the Boy Scout Movement, not only in Edinburgh, but in other parts of Scotland, had been of the greatest value and had been the means of keeping the lads on the straight

WHERE BOY SCOUTS ARE NOT

A story is going the rounds how Magistrate, suffering from rheumatism and feeling very liverish, was bumped into by a Boy Scout while walking along the street.

Turning to a friend, the Magistrate, in an annoyed tone complained, "These Boy Scouts are everywhere, they bump into me in the street, I see them along country lanes. They are always trying to help me across the road when I happen to limp. Oh I see them everywhere."

"Indeed," said his friend, "did one ever appear before you in Court?"

The Magistrate thought deeply for a moment and then, turning to his friend with a smile, he said, "No never in my whole career: perhaps there is something in this Scout Movement after all."

A Copy of this Prospectus, has been filed with the Registrar of Companies. The Subscription list will open on Monday, the 1st day of December, 1930. and close on or before Saturday, the 31st day of January, 1931.

OBJECTS.—The Company has been formed to carry on the business of Brewers, Distillers, Maltsters, Wine and Spirit Merchants, Acrated Waters, Cordial and Ice Manufacturers and any other business as indicated in the Memorandum of Association, a copy of which forms part of this

PROSPECTS OF COMPANY .- The advent of a Brewery in this Colony cannot now be looked upon as an entirely new project, but in view of changed conditions, it is no exaggeration to say that its success on the lines indicated in this prospectus may now be anticipated with complete confidence. The main contributing factor is the already largely increased and rapidly growing consumption of beer as a beverage amongst all classes, particularly the Chinese people, in the Far East, giving a market for sales in China alone, which can be assuredly expected to tax a Brewery such as is proposed to its capacity once the work of its establishment is reasonably advanced. The following facts are presented for consideration:-

1. All materials required by the Company are duty free in Hong Kong enabling a first class beer to be placed on the market at the lowest possible price. The machinery and plant are being purchased from Messrs. Skoda Works of Pilsen Czecho-Slovakia who are among the leading manufacturers of Brewery plant. The manufacturers have guaranteed the quality and output, and will furnish the services of an expert brewer.

2. The advantage enjoyed in this Colony in comparison with those countries from which our present supplies of Beer are imported, so far as supply and cost of labour is concerned, are manifest. 3. Climatic Conditions. One of the most successful Breweries operat-

ing in the Far East is at Manila. 4. Furthermore, as the Company requires a refrigerating plant for the Brewery, the manufacture of ice, also accommodation for cold storage will be considered, and will be easy of development as an . additional source of revenue. It may be stated that a contract has already been entered into, on behalf of the Company, with the. Dairy Farm Ice and Cold Storage Co., Ltd., for supply at a remunerative price of the whole of the Company's excess production

5. The following figures speak for themselves.

Importation of Beer and Stout into Hong Kong. 1926 496,549 Gallons 731,021

1928 599,856 The exceptional increase in 1927 was due to supplemented Naval and Military forces (the "Shaforce") in Hong Kong.

6. Breweries established at Peking, Tsingtao, Shanghai and Manils are operating most successfully.

SCOPE OF ACTIVITIES .- Brewery: Upon the basis of consumption in the Colony so far as same is ascertainable, it is estimated that about 50 per cent. will be consumed locally and the remainder will be exported. A reasonable estimate of output is 200 Hogsheads per week. Distillery: It is also the intention of the Company to erect a Distillery capable of an output of about 930,000 gallons per year of alcohol of the

highest grade, for drinking purposes as well as for other uses, both for local and export trade. CO2 Gas: It is proposed to purchase Liquifying Plant capable of transforming all the CO2 gas obtained by fermentation at the Brewery and Distillery into a marketable product. As this gas is a byproduct of Distilleries and Breweries the turning of it into liquid gas is a comparatively cheap process. CO2 gas is used as a refrigerating

medium, also in the manufacture of acrated water and for various other purposes. SITE AND WATER SUPPLY .- It is proposed to acquire a lease of land situate on Castle Peak Road. The water supply is adequate, and is of the highest quality. The following is an extract from the certificate of the Hong Kong Government Analyst as to the suitability of the water for brewing :—

"I am of opinion, from the above results, that this water is quite suitable for brewing of dark ales, stout and porter, and with the addition of 8 grains of magnesium sulphate per gallon, would be suitable for brewing of pale ales." MANAGEMENT .- A competent Brewer is available, and the executive

positions in the Company will be filled by experienced business and technical CAPITAL REQUIREMENTS.—For the formation of the Company and for the construction of the buildings and the purchase of the necessary plant and machinery for an output of 200 Hogsheads of Beer, Lager and Stout per week and 10 tons of Ice per day it is estimated that the capital

required will be \$500,000.00. ESTIMATED PROFITS:-It is estimated that the nett profit on the above capital outlay will amount to 24.5 per cent. per annum. Application for shares should be made upon the form accompanying the Prospectus and sent to the Company's Bankers together with a remittance of \$2.50 per share, the amount of the deposit.

Where no allotment is made the deposit will be returned in full and where the number of shares allotted is less than the number subscribed a proportionate amount of the deposit will be returned. Prospectuses can be inspected at and Application forms obtained from the Company's Bankers, and at and from the office of the Company at

Rutton Buildings, No. 7, Duddell Street, Victoria, Hong Kong, The following further information is given in accordance with the requirements of the Companies Ordinance, 1911. (a) A copy of the Memorandum of Association is printed in the fold

(b) Directors' Qualification and Remuneration. - The Articles of Association provide that the qualification of a Director is to be the holding of Two hundred shares. The remuneration of Directors will be decided at a General Meeting of Shareholders but will be

not less than \$1,000.00 per annum.

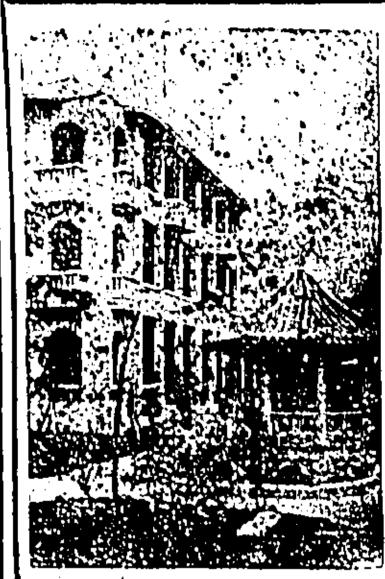

(c) Underwriting and Brokerage. — Brokerage at a rate not exceeding 4% per cent. will be paid on all shares underwritten. (d) The Company will pay the preliminary expenses of and incidental to the formation of the Company up to the time when it becomes entitled to commence business.

(e) Material Contracts.-No material contracts have been entered into on behalf of the Company, other than the contract for a lease of land and the contract with the Dairy Farm, Ice and Cold Storage Co., Ltd., hereinbefore referred to. (/) Payment to Promoters.—For the services rendered and expenses

incurred by the Promoters, who have been engaged for a lengthy period in the necessary investigations, there will be allotted to the Promoters two thousand shares in the Company credited as fully (a) Nature and extent of Directors' interest in promotion. Other than the interest of Mr. Ruttonjes in regard to the proposed lease, and the interest of certain of the Directors, as Promoters, no Director is interested in promotion of the Company, and no

consideration has been paid or agreed to be paid to any person to induce him to become or to qualify him as a Director.

This Prospectus has been duly sled with the Eczistrar of Companies. Dated the tenth day of November, 1030,

Smart, the fisheries, and great areas have

Oysters. Largely on account of pollution, in 1920 that figure had been reduc-

Dealing with the question of the effect of pollution on river fishing, Mr. Reginald Beddington, President of the National Association of Fishery Boards, said "the present condition of most of the rivers of England is deplorable. Some have become open sewers. others are either-devoid of fish or

"The recent wholesale 'murder' of fish by the effluent from bect factories roused public opinion," he said, "but no effectual remedy has been applied. The preventive powers as do exist are in the hands of so many authorities that little or nothing is done." The rivers Culm and Creedy, he

added, were grossly polluted, and tons of fresh water fish in the Gipping had been destroyed by alluents. The estuary of the Lund was grossly polluted, and it was said that practically no fish were left in the Wissey below a certain point. Part of the Tees was fishless, the Ribble was badly affected, and the Trent, at one time one of the most prolific angling rivers of England, was tions of its course.

certain evils were still unchecked, as, for instance, "dam 'sludging," which consisted of putting back into a stream the mud and sludge which had accumulated in reservoirs or mill dams. This was still legal and rivers boards were impotent to prevent it. Furthermore, many lovely streams were rendered hideous by tins, broken

he added, more than half of the Mr. and Mrs. J. A. Tarrant, mussel beds of England and Wales Miss E. C. Tarrant, Lady H. M. had disappeared, and the discharge of sewage into the sea had Messrs. C. GOLD CUP FOR 1,000 K.P.H.

Chances for British Pilots.

WORLD RECORDS.

A gold cup of the value of £800, offered by M. Bleriot to the first actually, according to M. Bleriot | presenting the New South Wales himself, almost within the grasp of some intrepid speed merchant.

M. Bleriot expresses the belief that the cup may be won at the next Schneider Trophy race if not actually before, provided the airmen make an attempt at an altitude of 30,000 feet.

In making this prediction M. Bleriot cannot have overlooked the prodigious efforts of British engineers to embellish their already glowing sheaf of laurels, represented by the world records for the air at, 357 miles per hour, for land at 237 miles, for water at 98 miles and for the motor-cycle at 150 miles. In addition to "Miss England II," the British exhibits at Buenos Aires will include the fastest aeropiane and fastest motor car.

Speed is evidently good trade propaganda, for the dramatic goup of the motor-cyclist, Wright, in attaining 150 miles an hour on the eve of a motor-cycle show, it is estima? A has been worth £250,000 in orders for British Industry.

KONG RIFLE

CLUB MEETING.

Sir William Peel to Be

Patron.

ELECTION OF OFFICIALS.

The inaugural meeting of the

Hong Kong Rifle Club was held in

the Board room of Messrs. Jardine,

Matheson and Co., Etd., yesterday

evening, when a large number of

enthusiasts voted in favour of the

formation of the club in support of

Dyer, who was responsible for call-

ing the meeting.

bus or rikisha.

mously carried.

motion proposed by Mr. R. M.

Mr Dyer, who presided, said that

Mr. G. Duncan and others had ex-

plored a site in Kowloon at the back

of Kowloon Tong. It was estimated

that the cost of laying out the range

would be roughly \$4,000, but the

Colonial Secretary had been kind

enough to inform them that the

Government would bear the initial

cost. It was for those present to

express whether the Club should be

formed and how many were pre-

pared to join. The site was a very

suitable one and was accessible by

Governor as Patron.

was to ask His Excellency the Gov-

ernor (Sir William Peel) to be-

come Patron of the Club and that

the officers should consist of the

President, Chairman, Hon. Secre-

tary and Treasurer with eight

members of the committee repre-

senting Kowloon, Quarry Bay, the

City, Army, Navy, Royal Air Force,

Mr. Dyer formally proposed the

formation of the Hong Kong Rifle

Club and, on Mr. F. C. Goodman

seconding, the motion was unani-

The Chairman proposed that Sir

William Peel be asked to become

the first Patron. His Excellency,

he said, had shown considerable

interest in the Club and had said

he would help it in all possible

ways. This suggestion was ac-

Mr. Dyer was elected the first

Presiden'. Mr. B. Wylie was

elected Chairman, and Mr. E. R.

His practice net was a simple the Recreio in a League match affair-half the size of a cricket net, with a sturdy mat off which to | after he has not played for a week is real. My chief anxiety now hit the ball.

The section that stopped the balls was formed of several layers of heavy netting, so that if the ball penetrated one network it would still be stopped by the next.

"So this." I said, "is the secret of your golfing triumphs lately!" This remark was accepted as a bit of leg-pulling, but I was never more serious.

The Explanation.

There had been an improvement in my friend's game, and I had no doubt that the net was the explanation of it. There is no game that benefits more than golf by practice, and I cannot think of any

I have seen players practising | A player I know likens the difputting along a carpet into a turned | ference | between | starting | after glass, but a carpet does not seem to | practice and starting without pracme a very good substitute for a | tice to the difference between putting green.

An outdoor net, though, is useful for getting in work with any club. It is more satisfactory than a captive ball, or a light ball, because the golfer gets the "feel" of his shot. Young cannot, of course, see the ball travel into the net—it is a mistaké-to look up to see which part matches between the Civil Service of the netting is struck-but you C.C. and Kowloon C.C. arranged do not need to see the ball to know how you have hit it.

My own experience is that I know a good shot from a poor shot about three-quarters the way through the prove his game, he should keep to downward swing, that is, before a single club; when he is warming the ball is struck, and I assume that other players are the same.

starting a cold engine and starting one that has already been running. There may be little in it. but. on the other hand, there may be a

Interesting Point.

An interesting point is whether the player should confine himself to one club, or whether he should give them all a couple of minutes. My answer to this is that he should give all a turn.

If a player is practising to imup for a round he should be more general about his work. If possible he should supplement net shots. The advantage of "warming up" | with a few minutes on the putting

ITALIAN BOXER'S RISE TO FAME.

"I'll Say I Am Satisfied" · He Remarks.

NOT A SLAUGHTERER.

Exactly a year ago Primo Carnera, the giant Italian boxer, landed in London practically down and out, in shabby clothes, and with but a few francs in his pocket, and an ambitious manager. His first fight in London against Stanley brought him in £100. Recently Carnera stepfrom a Pullman car at Victoria Station, dressed in the height of fashion, and with the air of a "man about town." Hundreds crowded around as, he faced a battery of cameras.

Carnera admits that his personal fortune amounts to £30,000. He says that he earned £100,000, but some nine persons were entitled to a percentage.

Carnera added: "I'll say I am satisfied. Two years ago I was handyman with a travelling circus, with not sufficient to whole thing is a miracle, and A player comes to it—perhaps still find it difficult to believe it stretching their delicate sinews in any other team game that men to prove to the English public A group of friends and enemies that I am not a slaughterer, but I

figure of speech seldom circulated before he can drop-kick or pass, she in the everyday conversation of is as likely as not to pour the ful that heyday of man's dominance. vocabulary of her scorn or dis-No doubt even \tlanta herself was appointment on the unfortunate regarded rather circumspectly by player of the other side. Women the members of her own sex, and enter into a game with a zest that as a forward little minx by males, is almost wholly emotional, and for the golden apples. Even the largely feature, such as in cricket, sight of women, protectively clad in | generally leaves her cold. That thick bloomers, indulging in the why, I am certain, the majority exhausting pastime of bicycling, of women prefer Rugby to archery, or floundering ungrace- play. It is rough and exciting fully in hobble skirts after a tennis | victory is always hard won, and it ball, slightly outraged the elderly is, perhaps, the most eloquent proof section of public opinion. As for of masculinity one could have. attending football matches, whether Rugby or Association, or (horror of horrors!) gloating beside a though some brazen hussies were known to do both, the respectable world of 1900-13 could only draw up its shoulders and shrug.

Rugby Preferred. Now, of course, it is the common thing to see women as spectators at football matches and not quite a rarity to see them playing the game themselves. The number of women which pays a toll at the gate to witness an International match at Twickenham, for instance, has increased to an enormous extent in the last five years. Women, for some unknown reason, appear to prefer Rugby to Association football, although nearly every "soccer' team has its quota of feminine followers. It is both interesting and amusing to watch a crowd of women at a Rugger game. Often the finer points of play are quite lost on them, but a good tackle or a brilliant pass down the threequarter line rouse them to unexpected heights of enthusiasm.

Personal Touch. They will gesticulate and cheer with the avidity of a veteran player who knows the game from the touchdown to the scrum, yet, and personal admiration of a player | main a spectator!

TO-MORROW.

The pre-War generation knew or players. If her husband picks very little about "sportswomen," a up from the scrum and is tackled for engaging to race Hippomenes | game in which slowness and skill Not A Success. On the whole, women make good

spectators and are quite as fair as crowd of men at a boxing contest, men, judged according to their own standards, which, it must be remembered, differ slightly from ours. The question of women players, however, raises a quite different aspect and one is apt to be Police, and Police Reserves. neither so enthusiastic or so optimlatic about the future of Rugby football should its fate lie equally the hands of women men. The good Rugger player needs a special stamina and physique that slightly differs from that of the "soccer" man and certainly from that of the hockey player. Many women play hockey as well as and frequently better than men, but I have seen women on the football field and do not hesitate to express the opinion that they were hopeless. They could kick quite well enough, often surprisingly high, but their sense of direction was poor; they had not ! the slightest conception of passing, and lost their heads at the approach of a crisis.

Spectator Only. In Rugby football I am afraid women would not stand the barest chance of competing with masculine teams, and the average male player would be extremely diffident about playing them at all. Few often their knowledge is scanty and | men. would care to tackle a girl on based upon a sketchy outline salved | the field, haul her down with a thud from conversations with husbands on the hard ground, or accidentally or brothers. KING HUFF.

A "Nonsense" Tale For The Tinies.

[Repeated by Special Request.]

Dick Whittington stepped out of his monoplane. His friend's low-flying bi-plane circled over-

"Can I see the King?"

The Court Poet looked doubtful. "As you were thrice Lord Mayor of London, you might, but—you musn't look at King Huff."

"Why ever not?" cried Dick. The Poet told him in rhyme. "Oh Huff in his velvet and lace, Is the haughtiest King of his

race ' ' ' ' His head lifted high and his

Unseen by the Court and the crowd,

Because it isn't allowed.".

"Has he got a stiff neck?" enquired Dick.

"He has not. It's sheer pride and bad temper. Only don't tell him I said so."

"How can I tell him anything without looking at him?" "You will be blindfolded," the Poet told him. "The courtiers are not. They fall flat on the floor: In ones, in twos and threes. On hands and noses and knees.

Would you like to borrow my hanky?" "I would not," replied Dick." "I have one of my own, thank you." The Poet led him, blindfolded,

into the Throne-Room, and hurried out again.

Perfumed, be-ruffed, padded, a foreign land, and hope to tempt

Treasures certainly did tempt lightful perfume invaded his brain like a mist of dreams.

"It will protect you from evil smells and infection," murmured

the man. Hearing the Queen's voice, Francis waved the man aside, and, running forward, bowed before Elizabeth, displaying the pomander hanging from his white hand. The Queen's eyes seemed held by the beauty of the glittering jewel. Delighted that she should notice him, Francis offered her the pomander, which she lifted smilingly to her nose. Suddenly she trembled, swayed, and held the pomander to her nose again. But, with a cry for help, Francis snatched it from her.

foul Spanish plot!" But the Spaniard, who was waiting by the river to attack an unconscious Queen, escaped as the Guard arrived, and Elizabeth walked back to the Palace attended by Francis. The boy was trembling now, but the great

Queen was calm. "When you have emptied the contents of the pomander into the river, wear it always on your finger to teach you caution,

Shell some Brazil nuts, and crush them with a rolling pin on

TALJA'S LAST FIGHT.

Talja, the lion, was dying. He Divide the players into two like a moving picture, he fought condenser.

The team sitting on the chairs of superior size and age. The have to try to blow the balloon fight had been long and hard, and tray successfully down the line so often that at last he reigned in undisputed sovereignty over far-stretching dominions.

the fairest lioness in many king-Little Jack had been so per doms, and brought her home to two will compete for this one would meet the situation, and all all dangers, and here she had last spoon.
that afternoon a desire for re-given him splendid sons of whom he might well be proud.

At length bedtime came, and, But now he lay, fighting his forced to acknowledge as victor.

23. Suffix.

EARTHLESS CRYSTAL SET.

As every wireless enthusiast knows, the aerial and earth are two of the essential components a board sprinkled with fine of the average crystal set. Howcastor sugar. When the nuts ever, it is not always convenient are crushed, mix them to a paste to have an earth: when the set to with more sugar and a very little is situated upstairs, for instance. change with time. Long ago, the piece of butter, kneading well Experiments with crystal sets of word lady meant a "server of with a wooden spoon. Have ready various types, showed one circuit bread," for it was derived from a well buttered, shallow tin; which worked almost as well spread the mixture evenly in this, without an earth as with one. If decorate the top with glace any Beamer would like to con-

> Obtain two cardboard tubes about 5in. long, one about 2in. in diameter, and the other a trifle smaller, so that it will slide loosely into the first. Wind each one full of insulated copper wire, any gauge. Now slide one coil into aerial to beginning of outer coil. As he lay there in his cave- Beginning of outer coil through that cave securely hidden in the crystal to beginning of inner coil. depth of the thick jungle where The other ends of the coils go to man had never penetrated-his the earphones, and the outer coil past life spread out before him should be tuned with a variable

MUSICAL SPOONS.

The players must arrange themselves in a large circle, all having a teaspoon excepting one player. The spoons will then all be thrown into a heap into the centre of the ring. The planist now commences to play, and the player will run round in a circle each player will then do his or her best to secure a spoon.

One, of course, will not be successful, and that one must drop out. A spoon is then taken from the pile, and the game goes merrily on, until all but two have He won over again his mate, fallen out, and there is one spoon left. In the same manner these

POLITENESS !

Teacher (to new boy): What's our name?

New Boy: 'Erbert 'Arris. "Always say sir," when you are speaking to a master. 'It's more polite."

New Boy (apologetically) Sir Erbert 'Arris.
